

New CAT approved for IP66M– New configurators

We are happy to announce that on April 30, 2020, the Ewellix factory in Gothenburg will launch a new motor house design for the CAT series. The change will only affect the standard range options as found in our catalogue and the ones with CxxC motors.

Customized designs and discrete items will be transferred to the new design after dialogue with the customer and in collaboration between the MU and the SU.

Customer benefits

- IP-65S/65M and IP-66S/66M according to IEC-60529 as standard
- EMC compliant, EN 61000-6-3 Group 1 Class A (Light industry and household)

Affected products

- CAT32B
- CAT33
- CAT33H

Changes to the previous version

- EMC filter will always be mounted in the actuator to comply with the EMC directive EN 61000-6-3 Group 1 Class A (Light industry and household)
- Dimensions of motor housing will be changed to accommodate EMC filter (See drawing)
- IP 66 will be the standard execution
- Cable will be the standard supply

Changes in the configurators

- Option to order without motor housing is removed
- Option to order without motor cable is removed
- Option to select EMC filter or not, is removed
- Option to select IP 44 or IP 65, is removed

New configurator numbers will be available and named accordingly

- CAT32B, 0406037-01 (previous 0406037)
- CAT33, 0406038-01 (previous 0406038)
- CAT33H, 0406039-01 (previous 0406039)

The new configurators will go live on April 30 and replace the previous ones. All orders placed through configurators will be delivered with EMC filter and the new motor housing from April 30 and beyond.
